Court Care

To maintain our courts we need to look after them! It is essential that our courts be watered before and after each set, especially if we have had no rain. But especially don't forget the courts must **always** be bagged and watered after the finish of play.

The courts will be damaged if players do not wear correct tennis shoes. A tennis shoe must be flat with a herringbone sole pattern. Cross trainers, running and gym shoes **must not be worn** because their raised heel and sole patterns damage the surface.

Coaching
