Clay Courts

At the start and end of each session, the courts must be bagged then watered.

Bagging the courts is done by one person dragging a sweeping mat across the court or up/down the court, keeping the mat flat with the court surface at all times. In heavy traffic areas (e.g. baselines), extra bagging in a figure 8 pattern is recommended. Courts to be bagged even if not in use.

Following bagging, the courts must be watered (this will depend on moisture levels of the court and weather conditions). Spread water evenly from fence to fence so that the clay is visibly wet without being flooded. Do not point the hose directly at the court surface or hose the same area for too long.
