Importing to Database

You can also import data from your member administration.

Export all the data of your member administration program to an Excel file. After that, these files can be imported into the player database.

1. Select **Player -> Player Database -> Import to Player Database** from the main menu.

2. Click on the [Browse] button to select the Excel file you want to import. Click Next to link the fields.

3. Now you can link the fields of your import file to the fields of Tournament Planner. Tournament Planner will try to create a link automatically using the field names (first row of the file). You can link the missing fields by hand. If all data is not present in your Excel file, then this won't appear in the player database of the Tournament Planner. Click on **Next** to continue.

5. The result is shown. Now you can check if the right data is filled in the right fields. You can go back to make changes if necessary. Click on **[Next]** to import the players into the player database.

Note:

- Players without a Member ID will not be stored in the player database.
- If a player already exists in the player database the old data is replaced.
