

Why should you use water tanks?

Clay Court Venues

Use of water tanks ensures clay clubs have access to ample water in the heat of summer to reduce the loss of clay dust reducing costs of maintenance and re-dusting over time.

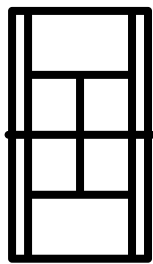

Lawn Court Venues

It can ensure that lawn courts can be fully maintained during the heat of Australian summers without drawing on irrigated or drinking water.

All Venues

Filtered tank water is softer on hard court surfaces reducing the build-up of limescale deposits that is common from treated drinking water. The use of water tanks can also reduce water bills and can lead to reduces storm water fees. You may also reduce reliance on town water and will be exempt from water restrictions (when using water from the water tanks).

What can the water be used for?

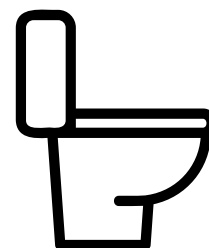

Watering clay & grass courts

Watering plants

Cleaning courts & other external areas

Flushing toilets

Quick Facts: What is contributing to your water use?

Action:	Amount of water used:
Toilet flush single cistern	10 litres
Toilet flush dual single flush	5 litres
Toilet flush dual full flush	10 litres
Bath	100 litres
Shower (10 minutes)	200 litres
Dishwasher load	50 litres
Washing machine load	150 litres
Drinking, cooking, cleaning per person per day	10 litres
Hand basin per use	5 litres
Garden sprinkler per hour	1000 litres
Garden dripper per hour	4 litres
Car washing with hose	200 litres
Hosing driveway	100 litres
Brushing teeth with tap running	5 litres
